

Course Title: Agile Project Management (AgilePM®) Foundation & Practitioner	Course Duration: 5.0 Days
Exam: Included	Exam Type: Proctored Exam
Qualification: Agile Project Management Foundation & Practitioner Certificates	

Course Syllabus

Our Agile Project Management Foundation & Practitioner will cover the following topics:

Module 1: Introduction To Agile Project Management

Establishing Agile Fundamentals

- Exploring the relationship between Agile, AgilePF, and DSDM
- Contrasting traditional waterfall project management approaches with DSDM
- Integrating DSDM with best practice methods
- Outlining the eight principles that guide DSDM

Preparing For An Agile Project

- Analysing the Project Approach Questionnaire (PAQ)
- Accepting the DSDM philosophy
- Identifying a successful team style

Module 2: Building The Foundations For An Agile Project

Completing Re-Project Activities

- Ensuring that the right projects are started and set up correctly
- Identifying essential members of the team
- Planning the Feasibility Phase

Assessing Project Feasibility

- Confirming that a solution exists
- Creating an outline business case
- Defining the project organisation structure
- Planning the Foundation Phase

Setting Firm Foundations For An Agile Project

- Integrating business, solution, and management perspectives
- Establishing a Prioritised Requirements List (PRL)
- Defining project and solution standards
- Agreeing on roles and responsibilities
- Extending the outline business case

- Baselining a schedule of project activities

Module 3: Evolving An Accurate Solution

Investigating & Designing Options

- Iteratively exploring detailed requirements and confirming viability
- Iteratively modelling solutions
- Refining the evolving solution to meet prioritised business needs
- Expanding and refining products

Incorporating DSDM Project Management Techniques

- Timeboxing development cycles
- Controlling progress throughout the project
- Delivering a quality product to meet requirements
- Managing project risk

Module 4: Deploying Solutions

Releasing To The Business

- Achieving acceptance from stakeholders
- Planning the release
- Transferring ownership to the business environment
- Migrating products into live use
- Training end users and completing documentation

Closing The Project

- Confirming that the benefits can still be delivered
- Formally closing the project
- Evaluating the project to support continuous improvement

Conducting Post-Project Activities

- Assessing whether the project benefits have been achieved
- Comparing the results of the projects to the original business case

Module 5: Foundation & Practitioner Exams

Preparing For The Examinations

- Gaining insight into the exam process
- Applying proven tips for exam success
- Practicing with sample test questions

Foundation Exam (Day 2)

- Completing the necessary APMG paperwork
- Taking the foundation exam

Practitioner Exam (Day 5)

- Taking the practitioner exam

Course Overview

Our five-day Agile Project Management Foundation & Practitioner training course will provide you with a thorough grounding in the Agile approach, and the certification aims to address the needs of those working in a project-focused environment who want to be Agile.

Our Agile Project Management Foundation & Practitioner training course will explain the difference between simple lightweight agile approaches which typically operate at the solution delivery (or 'work package') level and the greater holistic view of how multiple work streams are co-ordinated with the appropriate level of governance and control.

Course Learning Outcomes

Our five-day Agile Project Management Foundation & Practitioner training course includes both exams and provides a greater opportunity to discuss and explore the ideas and techniques behind the Agile Project Management methodology. It also allows you to take the Agile Project Management Practitioner exam on the morning of the final day leading to improved pass marks compared to exams taken during afternoons.

In this Agile Project Management Foundation & Practitioner training course, you will learn how to:

- Establish and lead a successful Agile project with the methodology developed by the DSDM Consortium.
- Review practical and repeatable practices for project managers in an Agile environment.
- Apply Agile techniques, such as modelling, prioritising, time-boxing, user stories, and estimating.
- Manage, define, and deliver a solution acceptable to the business.

Audience

Our Agile Project Management Foundation & Practitioner training course is aimed at Project Managers, Project Management Consultants and aspiring Project Managers. It is also relevant to other key staff involved in the design, development and delivery of projects who are required, or wish, to have a greater depth of knowledge of working in an Agile way.

Entry-Level Requirements

Familiarity with project work, either as a project manager or as another role on a project - this Agile Project Management Combined Foundation & Practitioner course is not designed to teach people how to be project managers. Instead, it is intended to provide an agile framework to those who already have some essential project experience.

Recommended Reading

The pre-reading material provided for this Agile Project Management Foundation & Practitioner training course will provide the Agile background necessary to be successful. For this reason, it is not required to have prior Agile experience (for example, Scrum), though we believe you'll find additional Agile experience helpful at the level of: [Agile Certified Scrum Product Owner \(CSPO\)](#)

What's Included

Our Agile Project Management Foundation & Practitioner training course includes the following:

- Full Course Materials

- Agile Project Management Foundation Examination
- Agile Project Management Practitioner Examination
- 3-Month Agile Business Consortium Membership

What's Next

PRINCE2® Agile training helps practicing PRINCE2® project management professionals tailor their approach to project management with the addition of Agile tools, techniques and methods.

Our two-day [PRINCE2® Agile Foundation](#) training course will prepare you to successfully pass the PRINCE2® Agile Foundation examination and learn how to take advantage of the compatibility between PRINCE2® and Agile.

Additional Information

As an APMG-certified Agile Project Management Practitioner, you will possess a deep knowledge of the Agile project management methodology and demonstrate skills for developing solutions incrementally, enabling teams to handle changing requirements effectively, improving team collaboration, and empowering individuals.
